

The Great Fossil Find

Poster Instructions

Make a poster to show your final interpretation of the fossils as well as how your interpretation changed as you got more information.

Each person's handwriting must be on the poster

Include in your poster:

The type of animal you think your fossils were

A drawing of what the animal might look like

Where the animal might have lived (in water, on land, on land and in the air) and why you think so

What you originally thought the animal was on Day 1

The biggest piece of evidence that caused you to change your interpretation from Day 1 to Day 5

What new pieces of evidence (such as another fossil from the animal) might support your hypothesis about these fossils?

What new piece of evidence might prove that your interpretation of these fossils is inaccurate?
