

Konichiwa – A low cost Japanese Program for Teens

Candy Sushi: <http://www.notmartha.org/tomake/hostesssushi>

You'll find links here and pictures for a variety of candy or sweet sushi

Games using chopsticks:

Chopstick pass along

What You Need

- Chopsticks
- Unshelled walnut
- Acorn
- Cranberry
- Pea
- Small plate

Instructions

1. Give each player a set of chopsticks and place an unshelled walnut, an acorn, a cranberry, and a pea on a small plate next to the oldest player. She begins by using the chopsticks to pass each object, from largest to smallest, to the person on her right, who receives it with chopsticks and passes it along to the next player. The object is to try to get all four objects back to the starting plate without dropping any of them. Players unable to manage the chopsticks can use a teaspoon instead.

Chopstick Pick-up:

To play this game, you need one bowl of marbles (we used m&m's), and a pair of chopsticks and an empty bowl for each player.

Players have 30 seconds to see how many marbles they can pick up with their chopsticks and transfer to their empty bowl.

To hold chopsticks, put one of the chopsticks in your hand and hold it just like you hold a pencil. Now put the other chopstick between your thumb and index finger. Move your thumb and index finger back and forth so the pointy ends of the chopsticks touch.

Players race to see who can pick up the most marbles in 30 seconds!
