

Cataloging AC Minutes 11/5/2020 (online)

Present: Lisa Bouchard (BETH), Rob Carle (UHLS), Xiaofei Li (APL), Jane Feeney (BETH), Lisa Thomas (BETH), Joe Thornton (UHLS)

No agenda, but we discussed the following, all about *SkyRiver*:

- Lisa Bouchard had asked in email why a record BETH had added multiple times in *Sierra* from *SkyRiver* kept generating the message “Deleted on September 9.” Rob passed the message to III and we’re waiting for a response.
- Joe asked about users’ satisfaction (or not) with *SkyRiver*. Unanimously positive, although not perfect. Xiaofei said that some “urban” material is not present in *SkyRiver*. Lisa B and others said they really like the fact that records are available immediately in *Sierra*.
- Rob explained the use of the “Derive record” function, demonstrated it with his shared screen, and recommended that everyone use it to prevent unwanted overlays of existing *Sierra* records.
