

## Cataloging AC Minutes 12/3/20

**Present:** Lisa Bouchard (BETH), Rob Carle (UHLS), Peggy Mello (COLN), Heather Nelson (GUIL), Lisa Pitkin (GUIL), Joe Thornton (UHLS), Elissa Valente (COLN)

Just getting back on our feet, so just a few attendees and an informal discussion:

Prompted by the departure of Joe Nash, Rob asked who's doing cataloging at COLN. Elissa: "Peggy and I." Peggy said that the workflow has changed since Joe left.

Lisa P said that GUIL is doing "huge amounts of weeding" in preparation for their major construction project.

**Serial records:** Lisa P said that some libraries still are not using serial records correctly. These records come from Nolo, Fodor's, etc., and need to be treated specially (say, like serial records). Rob asked if he could help but Lisa P said that it would be difficult.

Related to the above, Rob asked if his [Training website](#) is okay, and pointed out that the [Cataloging section](#) is largely based on Maggie Horn's training.

### ***SkyRiver:***

- Peggy said that it seems like *SkyRiver* is stripping the 082 field, and Lisa B said that sometimes the Edition field (250) is missing.
- Rob reminded everyone to use the *Derive* function when importing records.
- The "Request this" function doesn't seem very responsive. Rob will investigate.
- Rob will do *SkyRiver* training via *GoToMeeting* in January.
