

## Cataloging AC Minutes 1/7/2021 (online)

**Present:** Lisa Bouchard (BETH), Rob Carle (UHLS), Xiaofei Li (APL), Peggy Mello (COLN), Lisa Pitkin (GUIL), Lisa Thomas (BETH), Joe Thornton (UHLS)

No agenda, but we discussed the following:

- Xiaofei and Rob discussed the ongoing problem with APL staff using a VPN connection to the APL network from home in order to use the *Sierra Desktop Application (SDA)* for cataloging. We think this is a problem for the APL IT staff to resolve, and they're working on it.
- Lisa Pitkin updated us on the construction and RFID projects at GUIL. The entire collection has been RFID-enabled, and they're getting an automatic sorter like that used at Crandall Public Library.
- Lisa B said that the DDC 2020 is available in paperback at Amazon for \$104.
- Rob said that some libraries are not deleting 856 tags, which they should be doing for many records. *SkyRiver* allows you to change your profile to delete any tag on import.
