- Reindexing: III is ready to reindex our database with the changes we requested: index 6xx tags with all indicators. We discussed the final request and decided to ask that they include all indicators except '2' (include 0,1,4,7).
- 245\$h: Rob completed the deletion of all 245\$h subfields in the database, and cleaned up the resulting, unanticipated problems.
- Lisa P reported on the GUIL RFID project and the library's reopening progress after a major renovation.
- Catherine asked about the "Graphic Novel" Material Type. Rob added it but had to abbreviate it due to line-length limitations.
- At the next meeting we'll discuss whether we want to replace the term *downloadable* with *e* in our catalog descriptions, to conform to de facto standards.
