

Meeting summary for Cataloging Advisory Council (11/07/2024)

Quick recap

The meeting began with casual discussions about the weather and weekend plans, followed by a welcome for Loreen from Troy. The team then expressed gratitude towards Anne for her help on a project related to reproductive health information. Lastly, UHLS discussed an upcoming Sierra upgrade, the implementation of Lx Starter, and its potential implications for acquisitions libraries.

Next steps

- UHLS team to implement Sierra upgrade on Sunday night and monitor its completion by Monday morning.
- UHLS team to install and experiment with Lx Starter after the Sierra upgrade before rolling it out to all libraries.
- Rob to provide additional information or training on the new batch cancel order records feature for Acquisitions libraries if needed.

Summary

Welcome Loreen

The group welcomed Loreen Kaiser from Troy, who was filling in for Laurie Burns's role temporarily. The conversation ended without any specific agenda items being discussed.

Appreciation for Reproductive Health Project

Joe expressed gratitude towards Anne for her help on a project, which was appreciated by Mary Fellows and others. Anne couldn't recall the specific project but mentioned it was related to reproductive health information. The team acknowledged Anne's contribution and thanked her for her assistance.

Sierra Upgrade and Lx Starter Implementation

Joe discussed an upcoming Sierra upgrade scheduled for Sunday night, which should be completed by Monday morning. The main reason for the upgrade was to implement Lx Starter, a tool for customizing circulation notices. The team plans to experiment with Lx Starter before rolling it out to all users. UHLS also mentioned that the upgrade might have some implications for acquisitions libraries, particularly in terms of batch canceling order records and scope maintenance.
